U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05) Art Unit: 1761

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heitritter et al. (US Patent 5824355) in view of Lanter et al. (US Patent 5540932).

Heitritter et al. show all the limitations except the addition of fat. Lanter et al. teach adding fat to the protein before cooking it (col. 3, lines 25-30, 57-60). The protein disclosed includes soybean meal and the fat, soybean oil. Col. 2, lines 46 and 57. Maximum amount of fat added is 6 wt%. The mixture is subjected to cooking (extruder, col. 3 and col. 4). Lanter et al.'s invention is also drawn to a rumen bypass feed composition to increase milk levels and milk component yield. It would have been obvious to one of ordinary skill in the art to incorporate fat into the protein or oil seed meal by mixing in soybean oil, as taught by Lanter et al., for the benefits taught by the patentees. Furthermore, such incorporation would have been obvious since the inventions are both drawn to increasing nutrients to the abomasum and increasing their milk production, and they both use similar ingredients made in a similar manner.

Double Patenting

2. Claims 1-11 are directed to an invention not patentably distinct from claims 1-9 of commonly assigned US Patent 5824355. Specifically, the claims of the application include all the subject matter of the patented claims and in addition, claim the addition of fat to step b) of the process.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP Chapter 2300). Commonly assigned patent, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications pending on or after December 10, 2004.

Application/Control Number: 10/611,576 Page 4

Art Unit: 1761

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-11 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 5824355 in view of Lanter et al. (US Patent 5540932). See paragraph 1

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
